NexaWorks: Response to RFP No. KML/HR/2026/014 - HR Service Delivery Platform

Submitted to Kestrel Manufacturing Ltd (fictional) | Submission date: 2026-10-07 | Fictional proposal for classroom use

1. Executive Summary

NexaWorks proposes **NexaServe HR**, a configurable HR service delivery platform, together with a delivery and support model designed around manufacturing workforces with shift-based, frontline and office employees. Our proposal balances proven technology, a realistic fixed-price plan and a support model with financially backed service levels.

2. Our Understanding

Kestrel requires a cloud HR service delivery platform for about 6,500 employees across 4 plants and a head office: an employee self-service portal, HR case management with SLAs, a policy knowledge base, and integration with the existing SAP SuccessFactors HRIS and Microsoft Entra ID single sign-on.

Frontline employees at the plants often lack corporate laptops, so we include kiosk and WhatsApp access and Hindi, Marathi and Tamil language packs.

3. Proposed Solution

- Employee portal, mobile app and kiosk mode with multilingual knowledge base.
- HR case management with SLA timers, escalation matrix and confidential case handling for employee-relations matters.
- Pre-built SAP SuccessFactors integration using the standard OData APIs (daily full sync plus hourly delta), and single sign-on via Microsoft Entra ID (SAML 2.0).
- REST APIs for payroll and the ServiceNow IT service desk.
- Hosted on AWS Mumbai region with 99.9% availability commitment.

4. Implementation Plan, Team and Milestones

We use a phased, fixed-price delivery over **16 weeks** with a pilot plant before full roll-out. Governance includes a weekly working group and a fortnightly steering committee chaired by Kestrel's CHRO.

Phase	Weeks	Key deliverables	Exit criteria
1. Mobilise and discover	1-3	Process maps, integration design, RAID log	Design sign-off
2. Configure and integrate	4-9	Configured portal, SuccessFactors and SSO integration	System test pass rate 95%+
3. Pilot (Pune plant)	10-12	Pilot with 800 employees, feedback fixes	Pilot CSAT 4/5 or higher
4. Roll-out (3 plants + HO)	13-15	Wave go-lives, trained HR agents	Cutover checklist signed
5. Hypercare	16 (+4 wks)	Daily stand-ups, stabilisation	Steady-state handover

Named team: delivery lead (PMP certified, 14 years), solution architect, integration engineer, two functional consultants, test lead, and a change and training lead. A RACI matrix and responsibility split with Kestrel is included in Annexure A.

Top risks and mitigations: (1) SuccessFactors data quality - data-cleansing sprint in weeks 2-4; (2) low frontline adoption - plant champions network and kiosk access; (3) HR agent capacity during go-live - phased waves and floor-walkers; (4) scope creep - change-control board with documented approval thresholds.

5. Commercial Proposal

Item	Year 1 (INR)	Year 2 (INR)	Year 3 (INR)
Subscription (6,500 employees)	44,00,000	44,00,000	44,00,000
Implementation (fixed price, milestone-based)	30,00,000	-	-
Enhanced support (included)	0	0	0
Total	**74,00,000**	**44,00,000**	**44,00,000**

Three-year total: **INR 1,62,00,000** excluding GST. Subscription price is locked for three years. Payment for implementation is linked to the five phase exit criteria. Assumption: Kestrel nominates process owners for each HR service line.

6. Security and Compliance

NexaWorks is ISO 27001 certified and completed a SOC 2 Type I audit in 2025 (Type II in progress). Data is encrypted at rest and in transit, hosted in India, and processed in line with the DPDP Act 2023. Access is role-based with MFA for administrators, and audit logs are retained for 3 years. Annual penetration testing is performed by an independent firm.

7. Support Model and Experience

Priority	Response	Resolution target	Service credit if missed
P1 - platform down	15 minutes, 24x7	4 hours	10% of monthly fee
P2 - major function impaired	1 hour, 24x7	8 hours	5% of monthly fee
P3 - minor issue	4 business hours	3 business days	-

A dedicated Customer Success Manager runs monthly service reviews and quarterly adoption health checks. NexaWorks has completed 11 HR service delivery implementations, including two manufacturers with multi-plant frontline workforces (fictional references: Sahyadri Steel, 4,800 employees; Coastal Polymers, 3,200 employees).
